***A Complete Line of Products Specially Made  
for a Variety of Stone, Concrete & Terrazzo Floors***

- Choice of Technologies
- Cost Effective Daily Maintenance
- Environmentally Friendly
- Easy to Use

**Glit®/Microtron®**

# Introducing.....the new Cyclone™ Stone Care System from Glit®

**Cyclone is the latest example of Glit's long-standing tradition of bringing new and innovative products to the market. Cyclone pads repair scratches, restore the floor's gloss, and when used regularly, provides a simple, ongoing maintenance solution. Cyclone features a complete line of maintenance pads and effective chemicals that allow you to choose the best option for your customers. And, they are easy to use!**

## CHOICE OF TECHNOLOGIES

Using traditional and new technologies, the Cyclone Stone Care Product line features two different pad options:

**Cyclone-D™** made with traditional diamond abrasives

**Cyclone™** made with a proprietary diamond alternative technology

Depending on you or your customer's specific needs, either Cyclone-D or Cyclone can be easily incorporated into virtually any daily maintenance.

## COST EFFECTIVE

As with any surface, properly timed maintenance is less costly and ultimately more effective than reactive maintenance. The cyclone pads were developed so that they can be easily introduced without any additional cost, other than the pads themselves. Cyclone's unique construction yields longer life and higher gloss than other pad systems.

## ENVIRONMENTALLY FRIENDLY

Cyclone-D and Cyclone pads are made with 100% recycled fiber. Because of the unique attributes of the abrasives used, these pads can be used with or without chemicals.

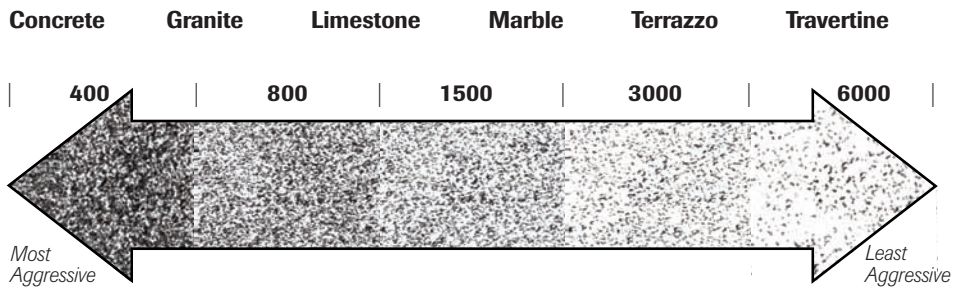

## Cyclone-D™ Diamond Abrasive Stone Care Floor Pads

**Cyclone-D is the latest in diamond pad technology. It is used similarly to other diamond pads already in the market, but our state-of-the-art technology yields better results with less labor. Even on the hardest floor surface, Cyclone-D can be used without heavy duty grinding equipment and strong chemicals; and, can be carried out daily with your existing custodial staff.**

### USING CYCLONE-D

Available in five levels of abrasiveness. Pads are available in a variety of shapes and sizes (see back) so that they can be easily incorporated with any floor equipment or hand tools. Cyclone-D pads contain wear indicators, making it easy to determine when to replace them. They can be used wet or dry, and are ideal for:

## Cyclone™ Stone Care Floor Pads

**Cyclone is made with proprietary diamond alternative technology and provides an economical solution to daily stone floor care. With five to ten times the life of regular aluminum oxide, our proprietary blend has now become, as an abrasive, a much less expensive substitute for industrial diamonds in numerous abrasive uses. Cyclone pads cut quickly without overheating or burning the material being ground, with high heat resistance and good mechanical strength.**

### USING CYCLONE

A three pad system; color-coded for easy identification:

**Green** - Used daily for a clean, safe and shiny floor.

**Yellow** - Micro polishes the floor to improve gloss and remove light scratches that distort gloss.

**White** - our most aggressive Cyclone pad, used for deep cleaning and scratch removal. Prepares the surface for micro-polishing.
