

Want green products with real impact?

double
GREEN[™]
by O'Dell

Recycled & Reclaimed Content Brooms & Brushes

- **Bristles - 100% recycled PET plastic.**
- **PET bristles have better springback than virgin poly.**
- **Wood blocks are reclaimed hardwood from sustainably managed forests.**

As the newest members of our EchoLine[®] of environmentally preferable cleaning tools, O'Dell introduces the Double Green[™] Line of floor sweeps and brushes. These products combine recycled materials in new ways to create high quality, durable versions of these workhorses of the commercial cleaning industry.

It's no secret - recycled PET plastic (from water and soda bottles) is the higher food grade plastic required by government standards. Recycled PET plastic bristles are superior in durability to standard polypropylene bristles. Double Green PET bristles also have far better "**rebound memory**" than standard bristles, making them far less likely to mat down and crush.

Double Green floor sweeps have blocks made from segments of reclaimed hardwood, connected with the same finger-jointing used for fine furniture construction. Double Green utility brushes and angle brooms have blocks made from recycled PET plastic.

**Double Green brooms and brushes -
quality, efficiency and value with real impact!**
