

# Flatware Presoak

## STEP #1

Add Soak It to empty bus tray. Activate dispenser with discharge tube placed in bus tray.

## STEP #2

Fill tray with hot water.

## STEP #3

Place flatware in tray to soak. Allow up to 15 minutes for best results.

## STEP #4

Remove flatware from tray, and place on flat dish rack, rinse thoroughly and run through dishmachine

## STEP #5

Sort to flatware containers by piece type with handles down and run through dish machine.

## STEP #6

Transfer to empty, clean, dry contain by turning full container over onto empty container. This will leave flatware handles up for

## DETARNISHING INSTRUCTIONS

Line bus tray with aluminum foil before following above procedure. Limit soak time to avoid aluminite redeposition.
